SUMMARY

I am a passionate Machine Learning, Data Science, and Artificial Intelligence researcher with a strong academic background and hands-on experience in Python programming, data structures, and deep learning. My goal is to contribute innovative solutions to real-world problems through cutting-edge research in Natural Language Processing (NLP), Internet of Things (IoT), and AI-driven technologies. I possess strong problem-solving abilities, a keen interest in data-driven decision-making, and a deep enthusiasm for technological advancements. With expertise in LLMs (Large Language Models), multimodal data analysis, and AI-powered predictive systems, I aim to drive forward advancements in healthcare, finance, and business intelligence.

WORK EXPERIENCE

Lecturer

(July 2026 – Present)

Department of Computer Systems Engineering, MUET, Jamshoro

- Conducting undergraduate courses in Computer Networks, ensuring students grasp both theoretical and applied aspects.
- Designed and implemented practical lab exercises and projects, encouraging students to apply theoretical knowledge in real-world scenarios

Research Assistant

(January 2025 – July 2026)

Department of Computer Systems Engineering, MUET, Jamshoro

- Conducting undergraduate courses in Computer Networks, ensuring students grasp both theoretical and applied aspects.
- Designed and implemented practical lab exercises and projects, encouraging students to apply theoretical knowledge in real-world scenarios

Teaching Assistant

(July 2024 – January 2025)

Department of Computer Systems Engineering, MUET, Jamshoro

- Conducting undergraduate courses in Python Programming, Data Structures, Object-Oriented Programming (OOP), and Discrete Structures, ensuring students grasp both theoretical and applied aspects.
- Designed and implemented practical lab exercises and projects, encouraging students to apply theoretical knowledge in real-world scenarios.
- Mentored students on research projects involving AI, ML, and NLP, helping them develop innovative solutions for industry-related problems.

EDUCATION

Master's in Data Science

(Feb 2023 – June 2026)

Mehran University of Engineering and Technology, Pakistan

CGPA: 3.69 / 4.00

Thesis: MemeMinds: Innovative Approaches to Depression Symptom Detection Using LLMs and Multimodal Analysis

Bachelor of Engineering in Telecommunication

(Oct 2018 – Dec 2022)

Mehran University of Engineering and Technology, Pakistan

CGPA: 3.65 / 4.00

Thesis: Identification of Adulteration in Liquids Using Optical Sensors

CONFERENCES & EVENTS

- Guest Speaker: MUET FM 92.6 – Topic: Entrepreneurship
- Creative Leadership Conference, AIOU (2024)
- Expanding Horizons: EZY Group & Huawei TechFusion (2024)
- Cybersecurity Workshop (2024)
- Zindigi Prize Participant (2024)
- Startup Stall at Cyber Feast (2024)
- MUET Leadership Conference (2019)
-

TEACHING & MENTORING

- **Teaching Assistant (MUET, 2024)** – Teaching core programming and data science concepts.
- **Private Tutor** – Assisted students in secondary, higher secondary, and entry test preparation.

CERTIFICATIONS & QUALIFICATIONS

- Machine Learning & Natural Language Processing
- Python Programming (2023)
- C++ Programming (2018)
- Final Year Project (FYP) Selected for Ignite Funding (2022)
- Volunteer at ICELL & MUET Gala

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, SQL
- **Machine Learning & AI:** NLP, OpenCV, YOLOv7
- **Software & Tools:** MATLAB, Streamlit, TurboC, Visual Basic 6.0
- **Databases:** Microsoft Access, SQL
- **Development:** Android App Development, GUI Interface Design

PROJECTS

- YOLOv7 Object Detection
- Gesture Volume Control using OpenCV & Python
- Smart Attendance System using Python
- Face Detection using OpenCV
-

EXTRACURRICULAR ACTIVITIES

- Player of WAPDA Basketball Team
- Startup Representative at Cyber Feast & Leadership Conference, AIOU Islamabad
- Public Speaker – Featured in various media interviews on entrepreneurship and startups
